- Software Architectural Programming
- Oracle 10i
- C-EH & CHFI
- Agile
- WebSphere Admin and Programming
- Informatica
- SourceForge
- DB2 Administration

## CONSULTING

Having gained Knowledge & Expertise over the years, the next step for any Enterprise IT Training provider is to offer Consulting Services to IT / ITES companies. We at Mazenet offer Consulting on the following domain,

- Complete IT Infrastructure Solutions – Turnkey Projects that are defined by client companies and are customized according to the need of the client.
- ITIL / ITSM - The IT Infrastructure Library (ITIL) is a series of documents that are used to aid the implementation of a framework for IT Service Management (ITSM). This framework defines how Service Management is applied within specific organizations. Being a framework, it is completely customizable for application within any type of business or organization that has a reliance on IT infrastructure.

The ITIL (IT Infrastructure Library) consists of 6 sets: Service Support; Service Delivery; Planning to Implement Service Management; ICT Infrastructure

Management; Applications Management; The Business Perspective. Although ITIL covers a number of areas, its main focus is certainly on IT Service Management (ITSM).

IT Service Management (ITSM) itself is generally divided into two main areas, Service Delivery and Service Support. Together, these two areas consist of 10 disciplines that are responsible for the provision and management of effective IT services.

- ISO-IEC 20000 - ISO/IEC 20000 is the first worldwide standard specifically aimed at IT Service Management. It describes an integrated set of management processes for the effective delivery of services to the business and its customers. It is aligned with and complementary to the process approach defined within ITIL from the Office of Government Commerce (OGC).
